NESS. By Dr. Kitto.

"This is a work of great interest, from one of the most learned and accomplished writers of the age, revealing the mysteries of the world in which those live who have been doprived of the sense of eight or hearing. Ever since his boyhood, for more than thirty years, Dr. Kitto has passed a life of great activity as a scholar, in a state of the most intense deafness to which any living creature can be subjected. His account of himself, and of his discriminating remarks on the condition of the blind, (James Mitchell, Laura Bridgeman, and others,) are replete with profound thought on the interesting phenomenon presented in the progress of their mental training."—Christian Observer.

MACHINE FOR CRUSHING, GRINDING, AND PULTERIZING.

Recently Patented in this Country and Europe.

COCHRAN'S Flanospherical Quartz Cressins and Pultinspection of the public, and will be submitted to any reasonable practical tests proposed by parties interested.

These machines, by their simplicity of construction, their durability, the undoubted principles upon which they operate, their effective operation and result, are justly outlied to the consideration of all parties engaged in grading, crushing, and Pulverizing Quarts, Iron Ore, Zinc, Copper, and Lead Ores, and all other Ores or Mineral substances.

It is the peculiar feature of the economy of these mechicos that they are found capable of crushing and pulverizing into the finest powder any amount of Quartz or other specific propers applied. The earthy matter is so completely ground and pulverized, that the Gold may be easily separated, and cubjected to any process of amalgamation that may be necessary.

The machines work and deliver wet or dry, as may be re-

eubjected to any process of amalgamation that may be necessary.

The machines work and deliver wet or dry, as may be required, and run with little friction, (being almost without machinery,) requiring no lubricating; the principle upon which thay operate precludes the possibility of their being put out of order; nor do they heat any material while being pulverized. They are at once applicable for all purposes of grinding and pulverizing, from those required by the Drug gist to those of the most extensive operations in California and Australia.

and Australia.

These machines are from two to twelve feet in diameter, with balls or spheres from three inches to five feet in diameter, each machine weighing from 250 pounds to 20 tous each, and are sold, with the right to use them, at from \$100 to \$5,000 each. to \$5,000 each.

They can be worked by steam, water, horse or manual power, according to their size; and by changing the velocity and proportioning the weight on the top of the balls, any desired amount of power may be used, from that of a

any desired amount of power may be used, from that to a man or horse upward.

The proprietors of this invention solicit examination, and will prove by practical tests the vest superiority and economy of these machines over any other, for crushing, grinding, putverising, hereigher effered to the public.

These machines may be reen in operation at the foot of South Eighth Street, Williamsburgh, at the large Patent Block and Saw Factory of Messrs. Burr, Waterman & Co., dirst street south of Peck Silp Ferry, every day, from 7 to 0 a. m., and from 4 to 6 p. m. For further particulars, apply to E. & J. BUSSING & Co., nug 23—2w 32 Cliffs treet, New York.

mug 23—2w

32 Cilif street, New York.

Mechanics, Manufacturers, and Inventors.

THE Eighth Volume of the SCIENTIFIC AMERICAN
commences on the 18th of september. It is principally
devoted to the diffusion of useful practical knowledge, and
is eminently calculated to advance the great interests of
industry—Mechanical, Manufacturing and Agricultural—
the genius and master-spirit of the nation.

It is unrivalied as a Journal of the Arts and Sciences, and
maintains a high character at home and abroad.

The publishers pledge themselves that the future volumes
shall at least equal, if not surpass their predecessors.

Among the subjects chiefly brought forward and discussed
in its columns, are Civil Engineering, Architecture, Railroads, Bridges, Arricultural Implements, Manufactures of
Motals, Fibrous and Textile Substances, Machinery for the
purpose, Chemical processes, Distilling, Coloring, &c., Steam
and Gas Engines, Bolders and Furnaces, Mathematical, Philosophical and Optical Instruments, Cars, Carriages, Water
Wheels, Wind and Grinding Mills' Powers, Planing Machines, Tools for Lumber, Brick Machines. Farming, Fire
Arms, Electricity, Telegraphs, Surgical Instruments, &c.,
besides Claims of all Patents, Reviews, Notices of New Inventious, American and Foreign. The work is in form for
binding, contains several hundred Engavings, over four
hundred peges of printed matter, and a copious Index.
Nearly all the valuable Patents which issue weekly from
the Patent Office are illustrated with Engravings in its columns, thus making the paper a perfect Mechanical Encyclopedis for future as well as present reference.

Valuable Premiums are ofered for the largest list of Subscribers to this Volume. It is published weekly by MUNN
& CO., at their Fatent Agency Office, 128 Fulton street, New
York.

TERMS-ALWAYS IN ADVANCE 

KRAUSER'S PATENT CLOVER-SEED HAR-

KRAUSER'S PATENT CLOVER-SEED HAR-VESTER
IS BEFORE THE PUBLIC FOR THE FIRST TIME
ITS utility is beyond comparison with any other farming
implement now in use. It takes the seed from the field,
leaving the straw or grass all standing. It weighs two hundred and fifty pounds, is drawn by one horse, and gathers
from ten to twelve acres per day. The fingers, or testh,
catch all the heads, the revolving knives cut them off and
throw them back into the box, which will cross a twentyacre field without emptying. The heads are then loaded
into a wagon and taken directly to the mill for deaning,
thus diminishing the labor three-fourths, and saving all the
seed. This machine comes so low that every farmer will
have it, and pays the manufacturer 300 per cent.

E. WHEELER, Agent for Washington.

Choss Kits, Washington Township, Camber Co., N. J., Soptember 4, 1851.

We, the undersigned, do certify that we have seen Mr. Krauser's Patent Clover Harvester in operation, and it has given perfect satisfaction. It has gathered many of the farmers' clover in this neighborhood—it is all that Mr. Krauser and his bills represent it to be. The farmers have given one-half for gathering and threshing.

JOSEPH DEWALD. WILLIAM P. GARWOOT WM. C. NICHOLSON, John F. Cook, James B. Cook, James Brison, Peter H. Jones. JAMES COLLINS, CHARLES LEWIS, THOMAS TUMBLESON,

Long-A-Comine, October 7, 1851.

This is to certify that Mr. G. J. Naylor has gathered clover ff of a sixteen-acre field of mine, which has been pastured we mouths with ten head of cattle, and it produced six usbels and a half and one peck of seed. I gave him two-pirds for gathering and cleaning. I think his machine is reteate, and answers all the purpose that is intended.

\*\*NEHEMIAH NICHOLSON.\*\*

The following points out the profitable nature of the The following points out the profitable nature of the

Garvester: KRAUSER'S PATENT CLOVER-SEED HARVESTER-KRAUSER'S PATENT CLOVEE-SEED HARVESTEE.
We have conversed with a number of Farmers, and they are
of opinion that there are at least 3,000 nores in each township in Camden or Gloucester county, New Jersey. Admitting there are but 1,000, it is said that each are will yield
from 1½ to 2 bushels. Reducing it to a certainty of yielding
but 1 bushel per acre, what will it cost to gather and thresh
1,000 acres?
This Harvester will gather 12 acres per day. At
6 acres per day, it will take 5 harvesters 25 days,
at a cost of. \$150
Threships. 200

Threshing..... Incidental expenses...... ... 150

Cost of harvesting, &c., 1,000 acres...... .\$500

have found them to agree unanimously with the above causation.

Perhaps no invention offers greater inducements for a profitable investment than the Harvester. For an enterprising young man, of good business habits, a large sum of money could without doubt be realized from the sale of rights in the different States of the Union not yet disposed of. By calling at this office, it can be demonstrated satisfactify that men of moderate capital could not choose a better or more money-paying business.

Those who wish to see a model of this celebrated farming implement, and the satisfactory manner in which it operates, can do so by calling at

E. WHEELER'S.

HARRIS & GRIFFIN. DISCOVERED AT LAST!

M. R. SCHLESSINGER has invented a Metalic Peu which supplies a want long existing. It is coated with gutta percha and most effectually resists the corrosive properties of the ink, and, being pointed with platina, has all the flexibility and smoothness so desirable in writing. It is equal in all respects to the most highly finished diamond-pointed gold pens, and is to be had at a price so reasonable that it must come into universal use.

This highly useful and desirable pen has been tested already in this city in engrossing on parchivent, and in the ordinary business writings, and its superiority is fully admitted.

The sole agent in this city is

itted.

The sole agent in this city is

Transition Coal.

This rare and valuable Coal is a variety not quite changed into an authracite, and it has only been discovered (in large quantities) at three places upon our globs, viz: at South Wales, direct Britain; at Donets, in Russia, near the Black Sea; and at Dauphin and Lebanon counties, Pennsylvania. In the London market this coal commands the highest price. It is now mined upon the large estate (43,000 acress) of the Dauphin and Susquebanna Coal Company, situated in Pennsylvania, and it is nearer to the cities of Baltimore and Washington than the coal of any other region. For easy ignition, durability of fire, complete combustion, easy adaptation to the temperature of the weather, and its great power in generating heat, it is the user coal in the world. It has the inflammability of the bituminous coal, with the cleaniless of the authracite, and a greater durability than either. It burns without making any soot or visible smoke, and the combustion is so complete that it retains the fire until all the coal is consumed. Not so with the authracites, especially the hard and heavy kinds. They do not burn up, and hence the common troublesome practice of sifting their ashes to obtain more fuel. In burning the Transition Coal there is no weste, for the small coals made by handling, burn as well as ordinary coal. All should be burned together. If screeped at all the dust only should be taken out.

A very erroneous impression exists with many persons that the heaviest coals are the most economical for ordinary on that the heaviest coals are the most economical for ordinary on that the heaviest coals are the most economical for ordinary

Transition Coal.

Transition Coal there is no neasts, for the small coals made by handling, burn as well as ordinary coal. All thould be taken out.

A very erromeous impression exists with many persons that the heavical coals are the most economical for ordinary purposes. This might be the case if coals were sold by measurement, but nover when they are sold by wrour. In Taylor's valuable work, (Statistics of Coal, the details are given to show that 31 pounds of a free burning red ash yielded more heat to a room in 16 hours, than 37 pounds of a heavy white ash coal, making the red ash, at \$6.00, to be more economical than the white ash at \$4.01 per ton. Any person accustomed to use these heavy coals will be astonished at the saving which can be made in burning the lighter kinds, when tested by the weight and burnt to a suitable manner.

An apprehension exists with some that the free-burning coals have a tendency to clinker. Now, as a general rule, no coal will clinker unless a greater draught be applied to it than the coal naturally requires. No one would think of applying a bellows constantly to a free-burning coal. But the heavy white ash anthractics cannot be burnt without a powerful draft, and without using a larger quantity of coal than the temperature of the weather sometimes requires. Various pat terms of stoves, furnaces, cooking ranges, &c., are invented annually to conquer this difficulty, but it has never been done with complete success Invervy contrivence, however, which has been invented to burn coal, the transition veriety will make a beautiful fire, and no complaint will ever be made to a manufacturer or seller of graves or stoves when this coal is used. The draft slone is to be regulated by a damper. In introducing this new coal for the first time, prepared as it now is by steam power machinery for domestic use, it may give greater confidence to the buyer to say that the celebrated free-burning red ash velos in the Peach of change will make a beautiful article, are a continuation of the Dauphin veries, and they ap

NEW SEVENTH STREET BOOK-STORE.

NEW SEVENTH STREET BOOK-STORE.

CIRAY & BALLANTYNE having secured commodious of and convenient premises in Seventh street, two doors above Odd Fellows Hell, (opposite the Old stand of A Grzy,) offer a new and beautiful assortment of Religious Books, selected with great care by one of the firm, to which they invite the astention of the Christian public.

They would also respectfully state, that having become the general agents in this city for the sale of the publications of Robert Carera & Bectruras, and of the Marmopar Book Corgans, they will always have a complete supply of their respective publications on hand.

They will also keep a general assortment of the publications of the Presbyterian Board, American Tract Society, American Sunday School Union, &c.

Their assortment of JUTENIE BOOKS, and Works suitable for Sunday School Libraries, will be very extensive.

The Depository of the Washington City Bible Society is transferred to their sfore. Next Bibles at 25 cents, and Testaments for 64 cents.

It will be their ambition and pleasure to keep such an assortment of Religious Books as will entirely supply the increasing demand for this kind of literature.

They carneedly solicit the co-operation of Christian friends in the great and important work of widely chrealating this class of publications, and thus counteracting, in some degree, the deleterious effects of the light and corrupt reading that is fooding the country to such a fearful extent.

In addition to their extensive assortment of Religious Books, which comprise all the best standard and miscellaneous works of that class, they will keep constantly on hand a great variety of valuable Historical, Miscellaneous, and Juvenile Works of unexceptionable character; Books of Sacred Music; Hymn Books, such as are used in all the Books, of every kind in use, at the lowest prices.

Blank Books and superior Stationery in great variety, Pooket Knives, Porte Monnaies, Portfolios, Writing Desks, superior Gold Pens, and a variety of Fancy Articles.

DENTISTRY.

DENTISTRY.

DR. CASADAVAANT, Surgeon Dentist, formerly from Parls and New York, returns his a necre thanks to the citizens of Washington and Georgetown and vicinkies for the liberal patronage which they have extended; at meince has seateblished himself in this city, and would inform them that he has removed to Lame & Tucker's building, on Pennsylvania avenue, between the National Hotel and 414 street, where he still continues to perform all operations in his profession in a superior manner, at New York prices, so as to emable all to teet his skill, and he warrarts his work to be equal to that of the best Dentiets. As he manufactures his own artificial teeth, he is enabled to suit all cases, and will undertake to perform all those operations in which other Dentiets have falled to succeed. He will refer to many citizens of Washington and Georgetown, for whom he has performed operations.

August 1. The process of the contract of the set of the se

Protection from Lightning.

THE undersigned, being the duly appointed Agen;
Sprayer's Electrican and Electron Metalliungs Lie
Ming-Rom Manufactors, Covington, Kantucky, begs to office superior Rods, of Spiral-twisted, Carbonized Annealed
Iron, with Zine Protectors, and Electro-positive elements
combined in their manufacture; thus rendering them equal
to copper as conductors. They are in ten-feet lengths, with
accurately-fitted breas-serow connecting Joints, an entire
new style of metallic (patented) attachments, for brick or
frame buildings; also, glass isolators, of a novel and ingenious construction, (pacented), forming a lock; the whole
mounted with a solid platinum sliver point (patented),
twelve inches long, surrounded at the base with three angular negative magnets, which possess the power, to an extraordinary extent, of discharging the opposite elements of the
most fearful thunderstorm, and embrace the entire perfection of science up to the present time; the whole constituting the most magnificent and perfect aftent conductor ever
presented to the public.

Safety has not been compromised by affording these excellent rods at such low rates; the greatest attention has
been given to their construction, so as to be readily attached.
The astonishing power of the negative magnets, in discharging the air of its opposite elements, has been elearly demonstrated by the Electrometer, when unmagnetized points
have shown but slight results, though placed under the
same conditions. In fact, they gather and elently discharge
electricity from the atmosphere when you would scarcely
suspect any being present.

These improvements being secured by double letters patent, you are hereby contioned against laying yourselves
liable, by purchasing of those who are not authorized, or Protection from Lightning.

These improvements being secured by double letters patent, you are hereby cautioned against laying yourselves liable, by purchasing of those who are not authorised, or who are substituting inferior imitations. All agents duly appointed can show their certificates. Have good rods of none.

CHARLES W. HEYDON, Washington City.

I do hereby certify that I have app lied various powerful chemical re-agents to Spratt's Patent Points for Lightning-Rots, and that the results of these experiments convince me that they will resist the action of stimospheric causes, and thereby preserve the extremity sharp—a condition most essential to protection against lightning. The re-agents used in the above experiments were a solution of chloride of so dium, (common salt,) acetic acid, sulphuric acid, and hydrochloric acid. With the first, there was no action on the metal; with the several acids, there was very slight—a fact sufficient to show that atmospheric influences would have upo sensible effect.

JOHN LECONTE, Prof. of Nat. Phil. et Chem. JOHN LECONTE, Prof. of Nat. Phil. et Chem.

uo sensible edect.

JOHN LECONTE, Prof. of Nat. Phil. et Chem.

University of Ga., October 8, 1850.

The Lightning Conductors of Mr. Spratt, effered to me, are well calculated to perform the office for which they are intended. Yours, truly,

Prof. ROBT. PETER.

LEXINOTON, KY., February 20, 1860.

Chicaco, September 3, 1850.4

This may certify that I have examined, somewhat critically, James Spratt's Patent Lightning Rods, and that I am of opinion that it is constructed on selestific principles. For combining durability, cheapness, and efficacy, I deem it equal, and I think superior, to any other rod ever offered for my inspection.

Prof. JAS, V. Z. BLANEY.

AUGUSTA, (Ga.) November 11, 1850.

squal, and I think superior, to any other rod ever offered for my inspection.

Prof. JAS. V. Z. BLANEY.

AGRETA, (Ga.) November 11, 1850.

This will certify that I have examined the Lightning Rods, Metallic Points, and I isolating Attachments, manufactured by Mr. Spratt, and regard them as constructed in conformity to the sparsal laws of the electric fluid; and the metallic compound constituting the Points, as promising, from the result of several tests to which they were submitted, to resist for years the action of those atmospheric causes most likely to corrode them.

Prof. Phys. Sc., Emory College, Ga., and Prof. Chem. and Pharm., Medical College, Ga.

The Lightning Conductors put up by Mr. Henry M. Smith, of this city, on the plan of Mr. Spratt, appear to me to be very well devised; and, in point of mechanical construction, are the best I have ever seen.

It is to be hoped that the use of these Rods may become general, as an important auxiliary defence against a damper

which must be regarded as of no ordinary magnitude, to which all buildings are liable. R. SILIMAN, Jr., Prof. of Chem. in the University of Louisville, All orders left of the North St. (1997). Addreville, January 21, 1881.
